

## MAZDA PROFILE

**Mazda Group** with closely knit Associates and Collaborators - are Food Processing Projects Specialists.

### Expertise

**Mazda** is a premier Mumbai based Indian source for food and beverage processing plants, including design, fabrication manufacture and installation. The Group's production scope includes specialized manufacturing facilities in India and with our collaborators, associates in Europe.

With over three decades of experience, we have built and rebuilt much of the equipment that runs some of the best and most respected industrial companies. We often exceed Food Sanitation requirements — and always meet client expectations for timely delivery and exemplary workmanship.

### Design

We ensure a viable project is conceived with requisite synergy and optimization features.

We fabricate and install industrial equipment and processing lines. Our design approach optimizes fabrication and anticipates installation issues. Our expert in-house engineering ensures efficient operation and on-time completion of every line and plant.

Our design engineers and CAD drafting experts use the latest Solidworks® and AutoCad® tools up to final construction drawings for solutions that are both functional and constructible.

Specializations include:

- French Fries / Potato Products plants
- Tomato Paste and Ketchup Plants
- Fruits extractions plants- juices, purees, pulps
- Frozen Fruits and Vegetables
- Cold Chain elements. Including Aseptic Packaging and Storage
- Meats and Sea Food projects, RTE Food Projects

### Build

In **MaZda** Group's well equipped fabrication, machine building facilities, our team of skilled technicians operates an impressive array of heavy tools capable of fabricating stainless steel, aluminum and specialty alloys equipment.

### Install

Installation is the intersection and convergence of meticulous planning and careful execution. Since 1990, **MaZda** people have helped build our reputation for quality, project by project.

**MaZda** **GROUP** companies have a labor force of experienced engineers, foremen and precision mechanics to get your job done right.

### Project Management (In select regions)

Project engineers, skilled foremen and technicians bring a hands-on approach to your project for coordination, collaboration and problem resolution. **MaZda** can quickly transport, assemble, install and commission structural, and mechanical projects, with select equipment from India and Europe.

**MaZda** optimizes schedule and budget through strategic resource management.

Our project management team interacts with all associates, collaborators, from estimating to purchasing, expediting and scheduling. The breadth of industrial services we provide in-house gives **MaZda** unprecedented project control.

We embrace creative thinking — uncommon in the foods processing discipline- in order to develop and implement better projects. [Our costs are affordable.](#)

[Our approach is collaborative, open and transparent.](#)
